School is just around the corner

I'm sure many of you are gearing up for the start of school and soon will be swamped. We are on *high alert* to help you with FM system and alerting needs and will assist you in any we can.

Thank you for choosing Beyond Hearing Aids. We value the trust you place in us and work hard to meet your needs. Please let us know how we can help make your job easier when it comes to hearing technology.

New! Voyager 500A Deskphone Base with Bluetooth

If you like using Bluetooth with your cell phone, you'll love this option to use Bluetooth on your home or work phone. People who use hearing aids with telecoil or Bluetooth equipped hearing aids can now enjoy hands-free phone use at work or home.

If you have telecoils, you can pair any **Bluetooth** neckloop, silhouette, or DAI connector with the Voyager 500A for hands-free connectivity.

Bluetooth products that will work with the Voyager (*and* your Bluetooth cell phone):

- ClearSounds Bluetooth neckloop HC-CLA7BT \$199.95
- NoiZfree Beetle products
 - HC-BEETLE (silhouette) \$109.00
 - HC-BEETLE/LOOP (silhouette & neckloop) \$169.00
 - HC-BEETLE/LP/T (dual silhouettes & neckloop) \$199.00
- Williams Sound Bluetooth Neckloop Amplifier WS-CMBT \$149.00
- DAI connectors: HC-MACH2 \$109.00; HC-FREESPIRIT \$109.00; HC-BLUEFREEDOM \$99.00

HC-VOYAGER/500A
\$229.95

The Voyager also works with hearing aids that use streamers like the I-Com. It is an excellent option for work phones and is a good replacement for the Jabra A7010 that is no longer manufactured.

The Voyager 500A Deskphone Base connects to corded home or office telephones. It installs the same way an inline amplifier does by connecting in between the handset and base of the phone. You'll plug the ac adapter into the wall. Easy setup! Now simply pair your Streamer or Bluetooth neckloop with the Voyager and you are set to hear the phone through your hearing aids.

The Voyager 500 is normally sold with a small Bluetooth headset that fits in that clip on the front and the instructions show that earpiece. The Voyager 500A is just the Bluetooth base.

Call us for more information or if you have any questions about these products. We are happy to help!

TV Ears Updated and New Products

TV Ears Original (**TVEARS-1, \$149.95**) now comes with a Power Stacker Transmitter at no extra charge. The Power Stacker Transmitter decreases interference with plasma screen TVs and increases infrared strength. One year warranty.

TV Ears II 2.3MHz system is now available with two headsets (**TVEARS-DUAL, \$129.95**), or with one headset (TVEARS-2, \$99.95). Ninety day warranty.

The new Digital to Analog Sound Converter is for those TVs that have only a digital output jack and will not work with the analog systems. This converter patches in between the output jack on the TV and the input jack on the sound transmitter. Warranty information is unknown at this time. (**TVEARS-DAC, \$49.95**)
