President's Message

Becky Morris, President

What's Sweeter than Chocolate?

Happy Valentine's Day to all our customers and friends. There are only a few things in life sweeter than chocolate. One thing sweeter is to hear "I love you" when you talk with those special people on the phone. Being able to use the phone is the most important way to reach out to friends, family and the outside world.

So many people have tried "hearing impaired" phones and have not been successful. They often feel that nothing will work for them. Please, please show your customers how much they mean to you and make sure they know good quality amplified phones are available with every feature possible. It is just another way to show you care.

Sonic Boom Sweetheart Clock

This heart-shaped hot pink alarm clock is pure eye candy. It has a multi-colored display and a flashing alarm light:

- Packaged with Sonic Alert's newest most powerful 12-volt bed shaker
- Hi/Low dimmer switch to sleep better at night
- Extra loud pulsating audio alarm with a loud 113 dB adjustable tone and volume control
- Battery backup to maintain the proper time in case of a power outage

SA-SBH400SS
\$42.95

Ubi-Duo Communicator: Talking Face to Face

Imagine the freedom to go anywhere and talk face to face with anyone without the need for an interpreter. The Ubi-Duo Communicator makes it possible! This device resembles two small, portable, wireless computers. At a touch of a button, it provides text communication in seconds. Soon you will see deaf, hard-of-hearing and hearing people chatting together on the job or over a cup of coffee without the need for an interpreter. It is available now on our website complete with literature.

- Split screen for simultaneous chat
- Adjustable screen angles from flat to 45 degrees
- Font size adjusts from 12 to 24 points
- Brightness and contrast are adjustable
- Reverse video screen for low vision users
- Full size keyboards – both units weigh 6 lbs
- 8-hour rechargeable batteries

HC-UBIDUO \$1,995 plus \$50 shipping fee

NoiZfree Beetle: Noise-Free Cell phone Accessory

One of our clients stopped using his cell phone nearly a year ago because it did not have a headset jack for many of the cell phone accessories. Because his new cell phone has Bluetooth capability, we recommended the new NoiZfree Beetle headset. He was astounded by the clarity of the cell phone call and began using it at work the next day. His co-workers are surprised that he can call vendors himself; now, he no longer asks them to do it for him when out on a job!

The NoiZfree Beetle headset transmits clear, quality sound directly to your hearing aid telecoil or cochlear implant telecoil from any Bluetooth cell phone. Place the slender ear hook behind your hearing aid and activate the telecoil. Clip the small Bluetooth receiver to your lapel, and you are ready to place and receive calls from your cell phone. A USB computer charging cable and AC adapter are included.

For the price of \$109 he is connected again. Amazing. Check out the NoiZFree Beetle on our website or in the catalog:

- Built-in volume control makes it easy to adjust for soft talkers or loud areas
- Powerful in-line microphone
- Rechargeable lithium-ion polymer 3.7 V battery provides 6-hours of talk time and 280 hours of standby time.
- Note: The 2-ear hook model comes with an incoming call alert and an Answer/End Call/ Power button

HC-NZF-BTL Single \$109

New! Array AG 300 Wireless Tour Guide System

Pass the word along to your vacation tour guides - people with hearing loss number in the millions and they want to tour! What's so great about this small group FM system? It transmits using ultra high frequencies (UHF). With this system, noise is virtually eliminated!
