

## The ALD Zone

Helping Professionals Provide Successful Solutions with ALDs since 1993

### We are going PAPERLESS!

We need your email address and your permission to email the notification. Make sure you don't miss an issue! See back page for details.

### SUMMER BLOWOUT SALE

It's summer and yard sale season is in full swing. The yard sale bug hit us here at work and we've been cleaning out our back room. So we ended up with a lot of discontinued, display and returned products that we don't need. These items are in working order and many of them are new in the box but discontinued models (you know how quickly phones change!).

LOOKING FOR A BARGAIN? Go to the online store at our website. The OPEN BOX category is at the end of the menu.

We often use these items for donations or when someone needs extra assistance. Maybe you'll find something you can use.

Because many of these are used or older models, the manufacturer's one-year warranty is not valid. The products are sold AS IS with a 30 day return policy. You can always call us with any questions.

### Williams Sound Presents Affordable Radio Frequency TV Amplifying System

Finally, a lower cost radio frequency TV amplifying system! Other radio frequency TV amplifying systems cost \$280 or more. The TVTalker WFM 260 is a high quality Williams Sound product that uses wireless FM technology which allows you to leave the room while still listening to your favorite TV or radio program.

This system is compatible with all TVs, including plasma and LCD HDTVs. It includes an audio cable with dual RCA plugs that plug into the rear of the TV or radio. A TV microphone is included for use if the TV/radio does not have audio out jacks. The microphone can also be used with this system as a personal amplifier at meetings or for small-group listening.

The under-the-chin receiver is light weight, with rotating eartips for hours of comfortable TV listening. The on/off microswitch is built into the receiver arm for easy on/off. With three selectable channels, the TVTalker FM provides a long range of 100' and a battery life of up to 6 hours per charge.

One thing we like about this product is that it comes with two rechargeable batteries, so there is always a charged battery in reserve for those days that you watch for more than 4-6 hours. When the battery runs low, switch in the spare battery that is in the charger and continue on with your program. Place the depleted battery back into the charger so it is ready for the next time you need it.

**Two year manufacturer warranty.**

**New AlertMaster is Coming September, 2010**

The AlertMaster system is transitioning to a new model. The base receiver and other receivers will be upgraded while the transmitters will remain the same. The new receivers are scheduled to be available in September, 2010. The manufacturer no longer has the AM6000 base unit. We do still have the AM100 and RX2 receivers. Here's a photo of the new design. We'll let you know just as soon as we can get it.

**THE ALD ZONE GOES GREEN**

This is your last paper copy of The ALD Zone Newsletter.

It will be available online. You can subscribe easily to email notification when the newest issue is available. Go to the NEWSLETTER INDEX at the bottom of the menu on our website [www.BeyondHearingAids.com](http://www.BeyondHearingAids.com).

If you don't already get an email when the newsletter is available, **SUBSCRIBE** for an email notification.

**Don't miss out!**
