Next ALD Training Class

June 27 – August 8, 2011

Last ALD Class of 2011

October 10 – November 21, 2011

Join us on June 27 through August 8, 2011 for a great 6 week class that will end right before school starts up.

An ALD Training Class Update:

I want to devote this newsletter to the ALD Training website and class. Page 2 still includes product announcements.

Only 2 classes remain on the schedule in 2011

If you've thought about the class but have been undecided, you may want to take advantage of the class during the summer months. We keep you up to date on the technology in bite-size pieces with a quick read each month with this newsletter. But to get a SUPER SIZED version that serves even 'seasoned' counselors with new products and ideas, you need to take the class.

- 6 weeks - 12 CRC credit hours - \$300
- About 1.5 hours a week (45 minutes viewing video and 45 minutes reviewing additional web/print related materials.)
- Answer a homework question each week. *Sample question: Describe anything you've learned in Module 2 that you will be able to apply to your next client (or a current one).*
- Access to all materials in the website for one full year

**Helping Professionals Provide Successful Solutions
 with ALDs since 1993**

Clarity XLC3.4 Cordless Phone is now available as a combo.

We like this phone a lot. It is fairly simple to use. The phone set has up to 50dB amplification and four tone settings. It has clear crisp sound and a loud adjustable ringer. The speakerphone in the handsets is extra loud and clear. Backup batteries are included so the phone can be used for 3-5 hours in the event of a power outage. Up to three more extra handsets can be added for \$99.95 each. Call us for more details. This is not in our catalog.

**CL-XLC3.4COMBO
 \$219.95**

New Amplified Cellphone

The ClearSounds AC100 ClearDigital Amplified Cellphone is available as an unlocked cellphone which enables you to select your own GSM wireless provider (choose from AT&T or T-Mobile). It offers 25dB adjustable handset amplification with tone control. Compared to the other cellphones in our catalog, the AC100 claims the loudest amplification and is the only one with tone control. This phone qualifies for Texas STAP. Check pages 4-5 to see other GSM cellphones in our catalog.

For more information on this GSM cellphone or any of the others shown in our catalog, give us a call and we will answer any questions you might have.

**HC-AC100
 \$179.95**

 VOYAGER/500A – p. 31)** is not being
 manufactured anymore, though we do have a
 limited supply. Look for a new product soon.

New Closed Caption Decoder

Close caption decoders have not been available at Beyond Hearing Aids for about a year. The API Closed Caption Decoder is now available for those who need this accessory. It hooks up to any TV or monitor with either RF 75ohm or RCA audio/video connections for captioning services. The manufacturer claims it is compatible with any TV, plasma screen or monitor through a video source (cable box, satellite receiver, DVD player or VCR). The decoder displays closed caption (second language available, if broadcast) or TEXT (news or other information, if broadcast on that channel). Closed captioning can be turned off when desired.

Call us if you have any questions about this product.
