Clarity Phones: Loud AND Clear

Often, people with hearing loss say, "I can hear you, I just can't understand what you're saying."

For people with poor speech discrimination, hearing better on the phone requires more than just amplifying the sound. These people require sound that is both loud AND clear. Clarity™ is the first company in the world to use technology that significantly improves the clarity of the amplified phone's speech signal.

This technology is commonly referred to as "Digital Signal Processing" (DSP). Clarity™ calls their DSP technology "Digital Clarity Power" (DCP). Digital Clarity Power has 3 features:

- Suppresses squealing.
- Reduces incoming line and background noises.
- Amplifies only the human voice while suppressing other sounds.

Here are 3 Clarity Professional phones with DCP that amplify up to 50 dB. These phones are great for people with mild to severe hearing losses who also have poor speech discrimination. Prices are reduced:

Clarity CL-4205

The Clarity CL-4205 is our most popular cordless phone – probably because of the DCP. It boosts sound up to 50 dB, and provides freedom of movement (due to 2.4 GHz technology). This phone has 3 tone settings to enhance high or low frequencies, a vibrating handset ringer, and battery back up in case of power outages. It comes with 2.5 mm and 3.5 mm jacks.

CL-4205 \$169.95

Clarity CL-4210

The Clarity CL-4210 has DCP technology plus Caller ID (50 name and number) and Call Waiting. This phone amplifies up to 50 dB and includes battery back up, adjustable volume and tone settings, super loud vibrating handset ringer and bright visual ring indicators. It comes with 2.5 mm and 3.5 mm jacks.

CL-4210 \$189.95

Clarity CL-2210

The Clarity CL-2210 is a corded phone with DCP. It amplifies sounds up to 50 dB. It includes Call Waiting, Caller ID (50 name and number), a built-in alarm clock, optional Bed Shaker and Lamp Flasher are available, 2 tone settings, adjustable extra loud ringer, and 2 one-touch emergency speed dial keys.

CL-2210 \$189.95

Clarity Phones: Adjusting the Tone

To hear better on the phone, some people just need to adjust the tone (enhance the high or low frequencies). They do not need the additional DCP technology available to those who have poor speech discrimination. Clarity's trademark name "Clarity Power" is the telephone technology that allows listeners to adjust the tone. Here are the recommended phones with Clarity Power. Find these phones (along with the Clarity DCP phones) on our website with all the benefits and features listed:

Clarity CL-C4105

This cordless phone boosts incoming sound up to 40 dB. It includes 3 tone settings to customize the listening experience, 2.4 GHz technology, bright visual ringer in handset and base, battery back up, 3 one-touch emergency speed dial keys, adjustable ringer volume and 2.5 mm and 3.5 mm jacks.

CL-C4105 \$149.95

Clarity CL-C420

This 900 MHz cordless phone boosts incoming sound up to 30 dB and is suitable for those with mild to moderate hearing loss. It includes Caller ID (50 name and number), customizable handset ringer, bright visual ring indicator in base and handset, large backlit keypad, 10 memory keys, 3 one-touch emergency keys, adjustable ringer volume, last number redial, and 2.5 mm jack.

CL-C420 \$99.95

Clarity WE-C435

This 900 MHz cordless phone boosts incoming sound up to 30 dB. Both antenna on handset and telephone base light up with incoming calls. The base ring is fully adjustable with amplification, pitch and tone controls. The handset has a large, backlit dial pad, 10 memory buttons, and a 2.5 mm headset jack.

WE-C435 \$89.95

Silent Call: Weather Alerting Products

Bad weather can happen quickly. Don't let it happen without warning. Silent Call Weather Alert Radios with optional strobe lights, transmitters and vibrators are available to keep you informed.

Discontinued Items: Knocklight Sensor SC-KST3240-L (page 57)
