Helping Professionals Provide Successful Solutions with ALDs

March 2009

www.beyondhearingaids.com

Spring is officially here  
March 20!  
We will see!

Change your smoke  
detector batteries.

## President's Message

Becky Morris, President

### *Behind the Scenes*

I want to share with you what happens here at our office when new ALDs are introduced. We stay busy testing each product so that we understand how it works. We compare it to other products already on the market. We actually read the instruction manuals!!

We plug it in right next to a competitive product for comparison. This helps us understand the differences and similarities. We research the manufacturer website and talk with other distributors when we want more information.

You can feel confident knowing that you have a dedicated staff whose full time job is ALDs. We are here to take the guesswork out of ALDs. **-Becky**

**SC-SKREC**  
\$184.95 Retail

## Silent Call Sidekick Receivers

To the left you see the standard Sidekick Receiver with Strobe (SC-SKREC) used commonly as a receiver for the Silent Call notification system. This receiver lets you know when you have visitors, telephone calls or emergencies with the bright flashing strobe and notification lights. One of the drawbacks to this receiver has been that if the consumer needed an alarm clock, we would usually recommend the Sonic Boom Alarm Clock with vibrator (which meant 2 different vibrators for alerting). This receiver is still available and will be useful for strobe notification in other rooms in the house.

Recently, Silent Call introduced a new Sidekick receiver that has the same functions as the original Sidekick, but with the **added function of an alarm clock!** And it's only \$15.00 more! It also has built-in phone signaler. The new Sidekick2 Receiver with Strobe (SC-SK2REC) is silver.

**SC-SK2REC**  
\$199.95 Retail

The current Silent Call transmitters and receivers operate on the 318MHz frequency with up to a 100 ft. operating range. This receiver has a range up to 500 feet – 4 times the distance of the original Sidekick receiver. Another added benefit of the Sidekick 2 receiver is **battery backup capability** (battery not included). **5 year warranty.**

## Silent Call has come out with a brand new notification system, the Signature Series!

**SC-SS/SK2REC**  
**\$239.95 Retail**

This new system from Silent Call operates on a different frequency than the original notification system mentioned on the previous page. This new **black** Signature Series receiver will only work with Signature Series transmitters. **The old and new systems are NOT compatible.**

The new **418MHz** Sidekick II Strobe Receiver (SC-SS/SK2REC) uses radio frequency technology, allowing you freedom and flexibility with outstanding features and **increased range of up to 2,000 feet**. Quickly know when you have visitors, telephone calls or emergencies with the bright flashing strobe and distinctive LEDs.

This black receiver will also work with up to **three smoke detectors** in the house to monitor each smoke detector for low battery, malfunction or blocked path.

This receiver has the **built in alarm clock, direct telephone signal interface, low battery indicator with battery backup** for receiver and clock. Bed shaker capability. This Signature Series Strobe Receiver will work with any Silent Call 418MHz transmitter for 24 hours notification of visitors, telephone calls or emergencies. **Five year warranty.** A new Watch Receiver and Watch Charger will be available in the near future.

*See page 68 of the catalog for a listing of all transmitters available for this new receiver. All products are available at the time of printing, with the exception of the Watch Receiver.*

**REMEMBER: The old and new systems are NOT compatible.** To know which transmitters will work with which receivers, check the Item Numbers:

Doorbell Transmitter SC-**SS**/DBTR will work with Signature Series Black SidekickII (SC-**SS**/SK2REC) and Watch Receiver (SC-SS/WR) when it becomes available.

Doorbell Transmitter SC-DBTR will work the original Sidekick (SC-SKREC), new Silver SidekickII (SC-SK2REC), Crystal Reflections Receiver (SC-CRREC) and Lamplighter receiver (SC-LLREC).

Please call us for any information you need on any Silent Call products. We will be happy to help you sort out which system is better for your client's needs, or which one is adequate and most economical for the situation.
