price lists will be distributed
early November.

2009-2010 FM Brochure
will also be available in
November.

Gift Ideas for the Entire Family

Have you begun planning for Christmas promotions? Consider adding some of these practical and useful items to display in your office this year.

Your clients may love to put one of these popular products on their 'wish list'. I love it when someone asks for something special that I can give knowing it's something they actually want. Gift givers will love to know right where to buy it too!

My brother would never have purchased a TV system for himself and his family often talked about how loud he kept the TV. My gift to him that year was a TV system that he loved, and his family loved even more.

Check out some of these popular gift ideas.

Is the TV too loud for you and not loud enough for your spouse, mother, father, or In-law?

Consider a TV amplification system as a gift for your family member (and secretly, for you!). You can listen to the TV at a normal sound level, while your hard-of-hearing family member can turn up the volume on the TV sound amplifier as loud as he or she needs and it won't disturb you and the rest of the family!

The TV Ears II is an affordable, basic model with very good sound quality. The infrared frequency should work well with most LCD HDTV's (but not plasma, flat screen or wall mount TV's). Works well in a room that does not get a lot of direct sunlight while watching TV. Headset is rechargeable and the listening time is up to 10 hours, depending on the volume setting.

TVEARS-2
\$99.95

HC-SET820
\$249.95

If you need TV sound amplification for plasma, flat screen or wall mounted TV, you will need a radio frequency model of amplifier such as the Sennheiser SET 820 RF TV Amplifier. This system works well in a room that gets direct sunlight while watching TV. It works with *all* TV's. The headset is rechargeable with about 4 hours listening time. A spare battery is advised, which is charged in the base (\$20.00 WEST-BA151).

Many other TV sound amplifiers are available in our catalog or online. There are models for use with hearing aid telecoils; some have earmuff style headsets, and one or two that can use most any headset or earbuds, and one that uses earbuds only.

Call us to help you choose the right one for your needs.

**Helping Professionals Provide Successful Solutions
 with ALDs since 1993**

Look for our new 2009-2010 catalog!

Our new catalog (with many new products) is due to come your way soon. If you do not receive your new catalog by December 15, call us and we will be sure to get one to you right away!

Discontinued Items:
 WS-WIR237 – SoundPlus TV Sound Amplifier
 HC-VW1001 – Vibrating Men’s Dress Watch
 GN-9120DHL – Telephone Headset w/Handset Lifter
 GAD-VL8A-P – VibraLite 8 Watch/Pink Band

Call us about any discontinued product and we will try to locate what product is available to replace it.

**Struggling on the Phone?
 There’s NO Excuse.**

No one needs to struggle on the phone with all the good amplified phones available. These are only 2 of the many models to help with moderate to severe hearing loss.

HC-T44
\$59.95

The Fanstel T44 phone has 45dB volume gain and is line powered. That means the volume control will work during a power outage because it is not dependent on electric to operate.

The XL40 amplified phone provides volume and tone control and is a most reliable phone for moderate hearing loss. You must plug in the AC adapter to power the volume control.

AMER-XL40
\$139.95

Offer the Gift of a Good Night’s Sleep

Never oversleep again or worry that you won’t wake up to the alarm. Did you know there are more than 15 different clocks to choose from? *See more options online or in the catalog.*

The hot pink Sweetheart Alarm Clock, the Sonic BOMB Alarm Clock, and the old-fashioned Analog Alarm Clock all feature a 113 decibel loud alarm and vibrating bed shaker to wake you up. The clocks each come with a 110 volt power supply that plugs into the electrical outlet in your room. **One Year Warranty**
