President's Message

Becky Morris, President

Hot Sellers!

The long, hot summer is coming to a close. In a grand finale salute to summer's end, we are featuring our top five hot sellers:

- Sonic Boom alarm clocks
- PockeTalker Ultra personal amplifiers
- Cardionics Escopie amplified stethoscopes
- Clarity cordless phones
- NoiZfree cellphone accessories

Sonic Boom: Alarm Clocks

The Sonic Boom alarm clock (with or without the optional bed vibrator) is a best seller because it is a good, basic, reliable clock that wakes you up in 3 different ways (while allowing you to use your bedside lamp for lighting). Sonic Boom gives a 5-year warranty and we seldom have warranty issues. (SB 1000 comes without the bed vibrator \$54.95)

SB 1000V \$76.95

PockeTalker Ultra: Personal Amplifier

If you have trouble hearing in small group situations, or in a noisy car or restaurant, the PockeTalker is the perfect solution. The PockeTalker consists of a microphone, amplifier and wire. It amplifies just the voice and not the background noise. The PockeTalker is amazingly versatile when you add different accessories. Check out Judy's blog to see the various ways you can use a PockeTalker:

WS-PKTD1-
E14 \$179

Cardionics Escopie: Amplified Stethoscope

This amplified stethoscope with behind-the head style headphones consistently meets the needs of ITE (In-The-Ear) hearing aids users and some of the open-fit mini BTE (Behind-The-Ear) models.

E718-7710 \$430

Clarity: Cordless Phones

The Clarity CL-4105 with a 40 dB gain is designed for people with a moderate hearing loss. The 50 dB model (CL-4205) has digital signal processing and is designed for people with a severe hearing loss who also have poor speech discrimination. These phones seem to meet the needs of most everyone who tries them. CL-4105 \$149.95

CL-4205 \$169.95

NoiZfree Dual Silhouette: Cellphone Accessory

Do you want to have a hands-free conversation while using your cellphone? Do you want great sound with no background noise? Simply place the NoiZfree hooks next to your telecoil equipped hearing aids and plug the other end into your cellular phone. If your phone features radio or mp3 player capabilities, the dual silhouette (two hooks) offers stereo listening at its best. (Also available for single hearing aid wearers).

HC-NZF-
D2.5 \$49.95

NoiZfree Beetle: Bluetooth Cellphone Headset

Experience the convenience of hands-free conversations with virtually no buzzing or interference! If you have telecoil equipped hearing aids (or cochlear implant) and a Bluetooth cellphone, try the Beetle:

- Volume adjustment on the base
- Headset talk time up to six hours
- Operating range approximately 32 feet
- USB computer charging cable and AC adapter included
- Rechargeable lithium-ion polymer battery 3.7V
- Headset standby time up to 280 hours

NZF-BTL \$109

New Products

Bluetooth Cellphone Neckloop: Wear this neckloop and turn on your telecoils to make and receive calls through your Bluetooth cellphone. Strong induction signal and no wires to your ears! Affordable price at \$169.00

ComLink Personal Sound Enhancer: This is a wireless system like an FM system. We tried out the system and are not happy with the sound quality or the sturdiness of the product. The control switch is difficult to locate if you have any visual problems. Even though the price is attractive at \$189.50, we do not recommend this unit at this time.

Discontinued Products

Sonic Alert DS700 wired doorbell signaler. (The DB100 and DB200 wireless models have replaced it.) Starplus Standard telephone from Krown is discontinued. The Starplus 45 is still available.

Price Changes

Comtek AT216 price increases 9/1/07 - COM-AT216 - \$1147 and COM-AT216SMP - \$1380.
Amplified Emergency phone (HC-AEC) has a significant price cut, nearly \$50. It is now \$199.95.
